Intersection of Science, Safety and Policy  
Hot Topics in Biosafety

The institutional biosafety committees from Yale and Harvard have partnered again to create an opportunity for education and discussion on more challenging topics for IBCs, biosafety professionals, principal investigators and research institutions. Hot topics and emerging pathogen oversight in biosafety will be explored.

Thursday, May 3:

Professional development courses

Friday, May 4:

Yale Harvard IBC Symposium featuring keynote lectures from leaders in the field with focused presentations that balance science, safety and policy

More information and registration will soon be available
